ANNOUNCES AFFILIATION WITH

VIRGINIA
Oral & Facial
SURGERY

January 2, 2024 -- Flagship Specialty Partners ("Flagship"), a leading management services organization serving the oral surgery and prosthodontic dentistry sectors, announced that it has partnered with Virginia Oral & Facial Surgery ("VOFS"), expanding Flagship's regional presence with seven new locations across the state of Virginia. This partnership marks a significant milestone in Flagship's mission to support practices offering exceptional care to patients and is reflective of its growth strategy of pursuing affiliations with leading specialty dental providers in existing and new geographies across the Southeast. "Our affiliation with VOFS is transformational for the Flagship platform and we are honored to partner with a leading practice in an attractive new geography," said Marshall White, Managing Partner at Reynolda Equity Partners.

For over 40 years, VOFS has developed a national reputation for providing exceptional oral surgery and cosmetic care to patients. VOFS offers the full scope of oral surgery, ranging from wisdom tooth removal and dental implant procedures to bone grafting, TMJ and complete facial reconstruction.

Dr. Ross Wlodawsky of VOFS said, "After thoughtful consideration, we felt that Flagship was the right choice for our practice and future success. Through our partnership with Flagship, we gain the benefits and support of a leading management services organization, and a very strong network of highly talented surgeons across the Flagship clinical family. We look forward to expanding our presence throughout Virginia and providing our patients with the same level of exceptional care to which they've grown accustomed."

"Our surgeons are thrilled to affiliate with VOFS," said Jason Lockwood, President and CEO of Flagship. "VOFS is a premier provider of full scope oral surgery services in the greater Richmond area and Flagship is excited to support their continued growth." "The relationship between Flagship's surgeons and VOFS' surgeons extends many years," said Dr. John Nale of Carolinas Center for Oral & Facial Surgery, a clinical practice supported by Flagship. "Their team of surgeons and scope of clinical services are excellent additions to the team of providers that we are building."

Flagship now supports over 43 locations and approximately 70 total providers. The 7 established locations of VOFS extends Flagship's clinical footprint into Virginia, and marks an important milestone in the company's growth across the Southeast.
